

# RM05S Series

**WinkEE**

0.5A, Non-isolated SIP Package Switching Regulators

## Features

- ▶ Rated current: 0.5A Max
- ▶ Non-isolated, step-down switching regulator
- ▶ Input range: 4.75~36VDC
- ▶ Regulated single output
- ▶ High efficiency up to 95%
- ▶ Low ripple and noise
- ▶ No load input current only 0.2mA typ.
- ▶ Operating temperature range: -40 ~ +85°C ambient
- ▶ RoHS compliant
- ▶ Compact SIP3 package
- ▶ Compatible with LM78 linear regulators
- ▶ Continuous short circuit protection
- ▶ Designed to meet: UL/EN/IEC 62368-1
- ▶ 5 year warranty

## Overview

The RM05S series are 0.5A rated non-isolated switching regulators, pin to pin compatible with LM78 family linear regulators. Unlike those linear regulators, the switching regulators are high efficiency. They do not need for any heatsinks because very little energy is wasted as heat. Besides, these converters accept ultra-wide input range, operate over wide ambient temperature range, and are continuous short circuit protected. These converters are especially suitable for applications where energy saving, space saving and high performance are essential.

#### Notes

1. C1, C2, C3, C4 are ceramic capacitors, and mandatory for operating of the converters. They can also be tantalum or low ESR electrolytic capacitors. Recommended specs listed in the table on right can be changed according to the needs in the circuits. Recommended LDM is 10uH.
2. The converter can be used both for positive and negative output using the circuit connection shown above.
3. These converters are not allowed to use in parallel or hot plug without support from properly designed external circuits.
